

## WATER POLICY

The purpose of Erkurt Holding Water Policy is to ensure the continuity of all our business processes, especially the production processes of Erkurt Holding and its subsidiaries, which serve the automotive and white goods sectors, and to raise awareness of the importance of water for all our stakeholders and to minimize the risks we may face by reducing the impact of potential threats related to water.

Based on this purpose, as Erkurt Holding and its subsidiaries; our priorities and goals by considering the right of all living things to access clean water and sanitary conditions:

- We comply with all relevant legal regulations and contracts that we are subject to in the water sector.
- In all our business processes, we identify, review and take measures to mitigate risks and opportunities related to water and climate change within the scope of ISO 14001 and in integration with our corporate risk management processes.
- In our business processes, we take the necessary measures to protect water resources, prevent water pollution, monitor and report our consumption and carry out continuous improvement activities to further reduce it.
- In order to protect the health of our employees and stakeholders in our work areas, we take the necessary measures to provide safe drinking water and to implement hygiene standards.
- We encourage all our stakeholders, especially our employees, suppliers and business partners, to carry out their activities in an environmentally responsible manner.
- In order to raise awareness of our employees to protect water resources and prevent water pollution, we provide training to all employees to improve their technical and behavioral competencies.
- When there is a possible violation in protecting water resources and preventing water pollution, we implement actions to detect, report and record the violation in question.
